DETAILED ACTION

1. This office acknowledges receipt of the following item from the Applicant:
Information Disclosure Statement (IDS) filed on 10/23/04 and it was consider.
2. Claims 1-28 are presented for examination.

REASONS FOR ALLOWANCE

3. Claims 1-28 are allowed.
4. The following is an examiner's statement of reasons for allowance:
Claims 1-28 are considered allowable since the prior art made of record and considered pertinent to the applicant's disclosure does not teach or suggest the claimed limitations. The prior art does not teach the claimed invention having in combination with other features, an apparatus having interface port for transmitting input and output signals comprising: a second circuit having a first and second terminals, the first terminal coupled to the a circuit, the second terminal representing a first combination of the input and output signals, and a signal level at the second terminal representing a second combination of the input and output signals; and a third circuit coupled to the first and second terminals of the second circuit for determining the input signal based on the signal levels at the first and second terminals. Prior art also does not discloses a transmission line having a first and second end; a first driver; a first bridge having a first terminal for coupling to the first end of the transmission line; a second driver, a second bridge having a first terminal for coupling to the second driver and a second terminal for coupling to the second of the transmission line; a first and second arithmetic unit for

processing signal levels of the first and second terminals of the first and second bridge respectively, to generate a first and second computed signal that corresponds to the second and first output signal respectively. Prior art furthermore, did not disclose a driver; an internal impedance having a first and a second terminals, the first terminal being electrically coupled to the driver and the second terminal being electrically coupled to the interface pin; and an arithmetic unit for processing signal levels of the first and second terminals of the internal impedance and for generating a signal corresponding to the write data.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takahashi et al (5721838) and Rokutanda (4245301) discloses information processing system and data storage system having storage device connectable to a computer system through an interface.
